

SENS QUATTRO Watch Security

Smartwatches and smartbands come in a wide variety. With fixed or easy to swap wristband or bodies. With generic or specific ways to charge these. The challenge for retail stores is to display and secure these in an elegant way...

SENS QUATTRO Watch Security

With QUATTRO and the available smartwatch adaptors, watches can be displayed easily. As the adaptors are made of stainless steel they offer the flexibility to be shaped for a perfect fit. Microsensors or ultrathin flexsensors are available in case the body of the watch needs to be protected individually.

QUATTRO works simple.

- Installed & operational in minutes.
- No central controllers
- No spiral cables
- No tubes and other typical 'line alarm' hardware to be mounted under the display

QUATTRO is flexible.

- Secure mobile phones, tablets, smartwatches and smart bands as easily as cameras and navigation systems
- Adjustable display angle
- Suitable for table top installations or slanted surfaces

QUATTRO is secure

- Advanced Self Alarming Sensor
- Optional Clamps for Phone and Tablets
- Optional Adaptors for Cameras and Smartwatches/bands
